I couldn’t have loved the layout of this book any more! As a person that loves all things organized, I couldn’t have loved the layout of this book any more! Even the little touches with the tabs being easy to ready in the shape of crayons was too cute and made it easy when looking for the answers. The rationales were anything but boring. For a review book, this one was not only educational, but actually very funny at times. Thank you Mr. DeBoer for writing something people can actually use and will remember for every day practice!
